## FOR IMMEDIATE RELEASE

### METAL CUTTING CIRCULAR SAWS FROM M. K. MORSE

CANTON, Ohio – June 2008 The M. K. Morse Company offers the latest technology in metal cutting with 9 inch (230mm) and 7 inch (180mm) Metal Devil® metal cutting circular saws with dry cutting technology. The powerful low-speed, high-torque motors are optimized for metal cutting.

The 9 inch Metal Devil circular saw has a powerful 15 AMP motor that delivers 2500 RPM for optimal torque. With a maximum cutting depth of 3-1/4 inches, this machine can easily cut up to 3 inch square tubing. Laser guide, 0-45 degree bevel cutting, durable carry case and a unique, quick release chip collection cover are some of the standard features. The 7 inch Metal Devil metal cutting circular saw offers a 9 AMP motor that delivers 3500 RPM for optimal torque in cutting applications such as 1/4 inch thick mild steel. Durable carry case, retractable blade guard, external overload and a unique, quick release chip collection cover are offered on the 7 inch saw. M. K. Morse provides a one year warranty and 60 day satisfaction guarantee on all Metal Devil saws.

Equipped with a Metal Devil carbide tipped blade, this combination provides professional users longer life, little to no sparks, superior cut finish and faster cuts at a lower cost-per-cut as compared to traditional abrasive cutting. M. K. Morse offers the broadest line of metal-cutting circular saw blades available today, with sizes ranging from 5-3/8 inch to 14 inch in diameter. These blades quickly cut through steel plate, angle iron, channel iron, and aluminum plate as easily as traditional saw blades cut through soft pine 2x4's. In tests, the Morse Metal Devil cut through 6 x 1/4 inch steel plate in an average of less than 12 seconds and 2 x 2 x 1/4 inch angle iron in less than 6 seconds.

(CON'T)

**About The M. K. Morse Company**

For forty five years, M. K. Morse has been providing professional quality products and dependable service. Morse offers a wide range of hand tool and power tool accessories, including hole saws, reciprocating saw blades, jig saw blades, portable band saw blades and hack saw blades, as well as industrial quality band saw blades and metal cutting circular saw blades. M. K. Morse products are readily available from contractor and industrial supply houses worldwide. For more information, contact The M. K. Morse Company, P.O. Box 8677, Canton, OH 44711, telephone (330) 453-8187 or visit their website at [www.mkmorse.com](http://www.mkmorse.com).
